

Addendum 4 - Update to Attachments B & C - Erate Eligible Category 2 Network Improvement

Amy Biehl High School FY 2018

This document is part of the complete request for solutions. Please read all four documents and any addendums that have been posted.

Questions

We feel that the requirements in Attachments B & C are very difficult to meet. Can they be modified?

We have discussed this with our team and determined such a change is **NOT** a cardinal change to the Form 470 and can be done.

Change 1.- The required outcomes listed in the Attachment B are now considered **OPTIONAL**. As optional they do count towards the final score but are not required.

Change 2. For switching and routing the following will be the required outcomes:

1. Speed - The vendor must describe how their solution meets the school desire to have the needed speed available to any student anywhere on campus.
2. Capacity - Vendor describes how their solution will meet the schools desire to handle 700 devices connecting in any one day.
3. Redundancy - Vendor must describe how their solution provides for failover of the Internet between the buildings.
4. Reliability - The vendor must provide a warranty that provides for two business repair or replace any new equipment.

Change 3 For firewall and content filtering. The required outcomes are **NOT** changed for firewalls and content filtering.
